**Re: In the Matter of Petition of USTelecom for Forbearance Pursuant to  
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

I am a consumer in San Francisco who supports broadband competition. I have FIBER service with Sonic, and they are the reason why competition should exist. Their service is fantastic providing me with gigabit speeds both upload and download with fantastic customer service at a fair, if not very competitive, price. I love my Sonic fiber service. Included in this package, I have a telephone which we use. This is a great product that is unmatched by the other two only carriers. Currently, I am out of work, and the low cost has enabled me to jobhunt and communicate with my family members without a disruption in our lives. We need more competition in the broadband space as ATT and Comcast don't provide a competitive product, their customer service is average, and they increase their price annually. Please don't inhibit or prevent other local competition from competing in the broadband space. Our whole economy rests on communication, either through voice or data, that is accessible and low-cost.

Thank you for your attention.
